To whomsoever it may concern

Feedback on Hydro geological study conducted at North Gardens, Kuduvathi village, Nandi Hobli, Chikballapura, Karnataka.

This is to inform that Mr.A Sivakumar and his team of geologists conducted study at North Gardens project. The ground water survey was carried out in systematic manner by them using state of art Geophysical survey equipment and the interpreted results matched with the bore well drilling results. The survey has helped our project meet the water requirement.

We have no hesitation in recommending the team for ground water targeting in Karnataka and other areas.
