TO WHOMEVER IT MAY CONCERN

It gives me immense pleasure to place on record the commendable service done by Shri Sivakumar in transforming the lives of thousands of personnel who owned barren land. I wish to share my own experience that how Shri Sivakumar's interventions has changed the face of our land.

Shri Sivakumar visited our jointly owned family dry land about 10 acres which was unfit for any use in the year 2016. He through scientific water divining and by using high-tech equipments found three sources of water. We successfully sunk 3 bore well. Now the dry land has turned into a lush green orchard with Mango & Coconut trees.

He has also systematically developed rain water harvesting and storage system by planning drainage system with injection well. Through his positive contribution, he is silently transforming the lives of many farmers in part of Tamil Nadu, Andhra Pradesh & Karnataka.

I wish Shri Sivakumar all the best.
